◊ Antiphishing
◊ Antispyware (attachments)
◊ Denial of Service Protection

Win the Battle Against Spam

Email has undoubtedly become a key tool for communications among companies worldwide. With frequent virus attacks and the alarming rate that spam fills inboxes, email is quickly becoming a less efficient means of communication. In fact, the Radicati Group, a market research firm in Palo Alto, California, predicts that by 2009, there will be 220 billion spam messages each day, representing the vast majority of email on the Internet. This is simply astounding and unacceptable. It's time to take control of spam.

The Bigi Solutions Managed Antispam Service includes all the features needed to eliminate your spam and completely protect your email server from all forms of attack. Email may be blocked, quarantined, tagged, or delivered based on the policies of the organization or the preferences of the individual user. The Managed Antispam Service is also scalable, matching the sizing needs of your business. Whether you have 5 email addresses or 500, we have the power to weed out your spam.

Over 3 million spam messages blocked to date

Featuring integration with Microsoft's Exchange Server 2000 or greater, Managed Antispam ensures that your email server won't be bombarded with mass spam emailings searching for valid recipients. A software plug-in for Microsoft Outlook allows you to classify messages as spam or not spam in order to fine-tune the filtering and further eliminate false positives. We offer a 30 day money back, customer satisfaction guarantee! For more information, please contact us today!
